

Torque Wrench Calibration

Scope

TEX Onsite provides a truly mobile calibration service to cater for the mechanical, mining and industrial sectors. Calibration of torque wrenches is now available for wrenches ranging from 0.5 to 1500Nm.

Advantage

Regular calibration will document the accuracy of your torque wrench so you know your measurements are correct and help to:

- Prevent expensive component failure due to mismeasurement
- Prevent expensive equipment damage
- Prevent personal injury
- Meet safety requirements
- Prevent costly recalls
- Eliminate equipment downtime
- Demonstrate compliance by recording all data re-test periods and asset numbers in our live database to create a history of your assets.
- Maintain your wrench to AS2193
- Meet ISO9000 and legislative requirements

Our flexible service is designed to meet your needs, therefore eliminating equipment downtime. We can calibrate and make minor adjustments on-site and carry some common parts so minor repairs can also be made depending on the nature of the fault. We can also look after uncommon or major repairs by taking the item off site.

Contact us to take the compliance hassle out of your business!
